

Saints Listed by Topics & Occupations

Imported Italian Saint Medallions
Hand-Painted in New Orleans, Louisiana

Here is a partial list of Saints' protections compiled alphabetically to show their various protections offered. It is basically accurate, though we have taken some liberty and added a few topics on our own. For example, when we discovered, in recent medical reports, that teenage girls and "Tweens" were purposefully harming themselves at alarming rates, we decided to make Saint Catherine of Siena a patroness of "Girl Power" and we started painting her in fun, bright, glittery ways to try and bring her story to young girls. It worked! One day I was working and received a call from a schoolteacher. She said "I don't know what you're doing but keep doing it! The girls in school are wearing Saint Catherine medals and paying attention in Religion Class like never before." That is one of the nicest compliments I have ever received. So, please be gentle with us if you see some slight discrepancy about a saint and their powers. We're trying to bring the saint, their stories and their energy to everyone, and in order to accomplish that goal, we practice using "Poetic License" every now and then.... But, generally speaking, the protections listed are accurate. If you have an addition or would like to offer a suggestion, we welcome your comments.
